

StudioSite™: websites for artists by cdeVision

We've customized a version of our Content Management System (CMS) as StudioSite™, specifically for artists to display, promote, and even sell their work online.

StudioSite™ is targeted to artists, photographers, designers—anyone who needs a portfolio-style website. What sets **StudioSite™** apart from other online-portfolio sites, is that **StudioSite™** websites can be easily updated and maintained by the artists themselves.

Show your current online portfolio to clients and galleries. Vastly expand your audience and make your work available to the entire web!

Features:

The core **StudioSite™** system includes everything you need to get started. Page editing, gallery creation, image uploading. There is no limit to the number of images you can display online. Add extra features to your site like a newsletter, PayPal sales, and other options (see below).

The **StudioSite™** CMS allows you to quickly and easily keep your entire site up-to-date. The CMS features an easy-to-use interface and requires no knowledge of HTML or other programming languages. **StudioSite™** websites are coded in valid XHTML and CSS, ensuring that they are fast-loading and easily indexed by search engines.

For pricing and more information, contact us at info@cdevision.com, or by phone at 413-532-6100.

What you get:

Base site includes: Custom site design, Home page, gallery/portfolio module*, contact page (incl feedback form), and up to 2 standard pages (e.g. a biography page, testimonials page, links page, etc).

Additional Services:

We can host your site too!

Hosting includes: 100mb space, webmail, up to 20 email addresses, hosting of StudioSite CMS.

Domain Name Registration:

We will assist you in the purchase of your domain name if you don't already have one.

**Gallery/portfolio module: there is virtually no limit to the number of galleries and images you can feature on your site.*

Modules:
